

Video Sales Letter Mastery

*Your 24/7 Salesperson: Creating a Video That Gets You
Appointments While You Sleep*

Objectives

- Understand how a Video Sales Letter (VSL) works in real estate
- Learn the structure of a VSL using your unique offer from the previous module
- Fill out the template
- Be ready to record and publish a version that builds trust and books appointments

Why This Matters

- 80% of the content people consume is video
- Most agents never use video, and that's your unfair advantage
- A VSL helps you stand out, sound credible, and pre-sell yourself to buyers and sellers before you ever get on the phone

What Is a VSL?

- Think of a VSL as your digital elevator pitch, but better
- It's a video that explains:
 - Who you help
 - What makes you different
 - Why they should trust you
 - How to take the next steps
- It works for you 24/7, builds trust, and makes you the obvious choice

Plug-and-Play VSL Template

→ Use one of the templates below to complete your VSL (make a copy):

- [Homebuyer VSL Template](#)
- [Homeseller VSL Template](#)
- [Luxury Homebuyer VSL Template](#)

How To Record It (Minimal Tech Needed)

- You do not need fancy editing, studio lights, or long speeches
- You do need a quiet space with decent lighting, a decent webcam on your computer/laptop, and confidence in your message
- Use zoom or loom to record

- Simply walk through the slides while providing value and sharing the information and being helpful to the viewers
 - Don't overcomplicate your setup. A simple computer/laptop mic and webcam should do.
 - You can pause the recording as you're going through it to allow for multiple breaks
 - Feel free to do a couple practice takes if needed

→ Record your VSL

How To Use It

- Once you've recorded your final take, you can create a free account on [Wistia](#) and upload the video there.
 - This will allow you to get something called a "hosting link", which we'll be using in the future. You can save the link here for now

→ Paste your hosting link from Wistia here:
